Good afternoon, Health Care Component Tier 1s and IT Representatives –

The Office for Civil Rights recently issued the attached page of information regarding NAS devices and malware. Please take just a few minutes to read it and consider how it might apply in the departments you support.

If you know of any of these types of devices being used by faculty or staff in the areas you support, please let IT Security know. It's important to the security of the University's information and information systems that IT Security be aware of these devices.

As Tier 1s and IT Representatives for the University's Health Care Components, you are all critical to the protection of patient information and the systems where that information is stored. Thank you for your continued help with HIPAA compliance.
